

TECHNICAL RIDER - 2SHER (DJ Performance)

GENERAL REQUIREMENTS:

- Professional DJ booth with unobstructed view of the crowd.

- Adequate ventilation and fan if booth lighting causes excessive heat.

AUDIO:

- 1x Professional 4-channel DJ mixer (Pioneer DJM-900NXS2 or equivalent).

- 4x Pioneer CDJ-2000NXS2 or CDJ-3000 (club standard, linked via Ethernet).

- High-quality monitoring system (booth monitors with volume control).

- All CDJs and mixer must be updated with the latest firmware and linked via LAN hub.

CONNECTION:

- All CDJs must support USB input and Rekordbox-analyzed tracks.

- At least one available RCA output from the mixer for recording (if needed).

POWER:

- Secure and grounded power supply for all equipment.

- Extra power socket available for artist's laptop or other gear.

STAGE:

- Sturdy, vibration-free table (minimum 1.2m length) for controller and peripherals.

- At least 2m² of clean, secure space for setup.

OTHER:

- 2x clean towels.

- 2x bottles of still water.

- Optional: 1x small fan in booth.

NOTE:

2SHER uses USB drives prepared via Rekordbox. No laptop required unless agreed in advance.
